

# Essential® Plus

## Fertilizer & Soil Amendment

\*NOT FOR FOOD USE

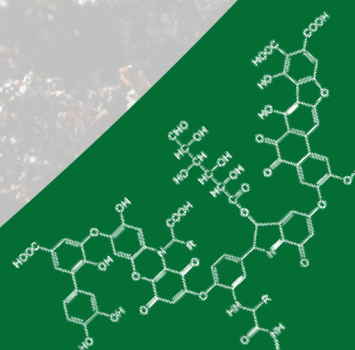

## Product Description

Essential® Plus is a soil amendment that delivers effective microbial stimulation for improved plant growth. Formulated for all types of soils, Essential® Plus contains organic building blocks such as proteins and humic acid; components not found in typical N-P-K fertilizers. These components also provide food for beneficial microbes which help alleviate soil compaction and replenish soils.

## Features

- Enhances beneficial microbe populations
- Improves nutrient absorption
- Enhances root and shoot growth

## Humic Acid

Organic compounds that:

- improves cell wall permeability
- increases microbial activity
- reinforces nutrient absorption
- enhances drought tolerance

# Application Methods

Please see product label for instructions and recommendations for application methods.

## Vicarage Road Stadium Watford, England

## The Breakdown

### **Humic Acid**

*beneficial impact on microbial diversity and soil building*

### **Organic proteins**

*increase nutrient supply by working as food for microbes*

### **Natural Wetting Agent**

*elevates tension on the plant's surface by preventing the build up of droplets on the plant*

**ENHANCES  
NUTRIENT  
AVAILABILITY**

**STRENGTHENS  
MICROBE  
POPULATION**

**ALLEVIATES  
SOIL  
COMPACTION**

**STIMULATES  
ROOT  
GROWTH**
