

# Residue<sup>®</sup> Complete

## BioFertilizer

**Residue<sup>®</sup> Complete** is a blend of fungi and bacteria that accelerates the break-down of residues; especially tough organic residues. When these are broken down quicker, more of the carbon in them is captured and recycled to help build soils. When soil building is accelerated and more soil aggregates are formed, nutrient uptake is enhanced and soil health is improved.

### Key Benefits:

- Contains its own food source
- Water soluble and easy to store
- Captures and holds bio-released nutrients
- Improves soil health through biology

### Key Ingredients:

- *Phanaerochaete chrysosporium*
- *Trichoderma reesei*
- *Bacillus spp*
- Humic Acid

### All Crops General Rate:

2 - 3 lbs per acre

Consult label for specific rates & application instructions.

### To Learn More:

Contact your local Distributor to ask about using Residue<sup>®</sup> Complete as part of your Agriculture Programs.
