

# ChitoNox™

## Pharma Grade Fungal Chitosan

**BellaTrove®**  
BioControl Family

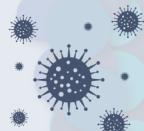

## Description

Seed treatment containing the active ingredient Fungal Chitosan, offering 3 modes of action to protect against soil-borne disease as well as free-living nematodes while stimulating root and plant growth

## Benefits

SUPPRESSION  
OF FREE LIVING  
NEMATODES

PROTECTION  
AGAINST  
SOIL-BORNE  
DISEASES

ENHANCED  
NUTRIENT  
UPTAKE

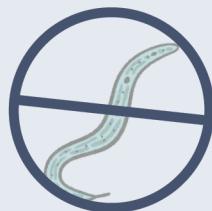

STIMULATES  
PLANT GROWTH  
& DEVELOPMENT

## Features

- One-of-a-kind Pharma grade Fungal chitosan that delivers more consistent performance compared to crustacean based chitosan. Non allergenic.
- Broad activity against both nematodes and seed/seedling diseases.
- Three Modes of Action against Soil-Borne Disease
- Better Together – Complimentary when paired with Companion Maxx ST and/or synthetic seed treatments.
- 100% reproducible from batch to batch
- Fungal chitosan has a strong positive charge which pulls in nutrients for uptake

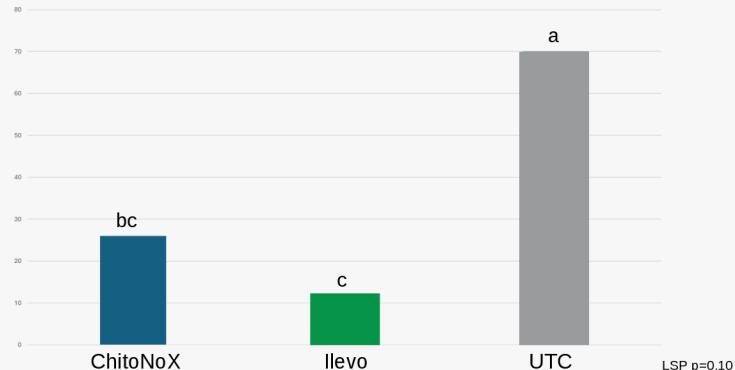

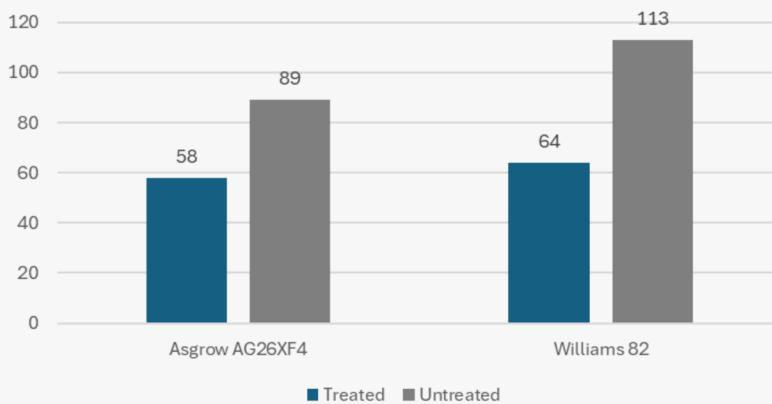

# ChitoNox™

## Better Together ChitoNox + Companion Maxx ST

## Root Knot Nematode Control on Soybeans Dr Lawrence - Auburn Univ.

SCN Control (eggs/root)

- Companion Maxx ST plus ChitoNox provide protection equivalent to industry leading llevo for SCN, without the "Halo Effect"
- 40-50% Reduction in Cysts

Control of  
Root Knot  
Nematode

## BioControl & BioStimulant Benefits

### BioControl

- Excellent Results on Fusarium
- Very little response from animal chitosan

### BioStimulant

- Plant Growth and More Uniform Establishment Illustrated on Ornamental Crops
